Important notes about Rating & Rank changes

- You need to **specify a 'Rating'** if you want to **play RATED games**
 - Choose your rating wisely, because this can normally not be changed after you started a rated game.
 - If you know your rank from another source, e.g. from another Go-Server or from an official rating-list, you may use the Rank Converter to find an appropriate rank on DGS.
 - If you don't know your rating at all, you may ask for help in the forums. An absolute beginner can start with a rank between 25k-30k.
 - We encourage you to trust the rating-system to adjust your rating. Playing many games helps in quickly adjusting your rating to the proper level.
 - The average rating-diff is about 0.3k for a balanced game, so you need to win ca. 3-4 games with an evenly matched player to increase your rating by 1k. However,
